QoS Settings

Uplink:
Set this to 85% - 95% (max) of your total upload limit.

Downlink:
Set this to 85% - 100% (max) of your total download limit.

Services Priority:

You may control your data rate with respect to the application that is consuming bandwidth.

Netmask Priority:

You may specify priority for all traffic from a given IP address or IP range.

MAC Priority:

You may specify priority for all traffic from a device on your network by giving the device a device name, specifying priority and entering its MAC address.

TCP-Packet Priority

Prioritize small TCP-packets with the following flags:

- ACK SYN FIN RST
